Transforming the way Case Management is done.

All Good Northwest follows the **Housing First Model.** Our participants have access to our innovative and comprehensive wrap-around services, built on providing safe spaces and restoring resiliencies. This includes **behavioral health care, case management, resource navigation, and peer support**, while navigating the challenges of accessing and retaining housing.

Partnering with Neighbors to Unlock a Sustainable Sense of Home

Our Mission

All Good Northwest Partners with Neighbors to Unlock a Sustainable Sense of Home

- We **Partner** with all neighbors, unhoused and housed, and alongside agencies in the communities in which we serve.
- **Unlock** to help people find liberation and hope in their circumstances.
- Create an environment that fosters Sustainable goals in a way that participants are prepared and have support to stay in housing.
- We believe that **Home** is more than "housing", that includes a sense of belonging and feeling supported, no matter where someone is on their journey.

Our Programs

Market Street Shelter

All Good Northwest's **emergency congregate shelter** site hosts up to 120 individuals experiencing houselessness and offer 24x7 on-site staffing and support. In addition to sleeping facilities, showers, restrooms, and meal services, the Market Street Shelter provides **the gateway** to our services.

Transitional Villages

- BIPOC Village
- Queer Affinity Village
- Multnomah Safe Rest Village

Each village provides safety and **transitional shelter** for 30-40 individuals as move along their journey towards permanent housing, including cultural-specific focused communities. Each transitional housing unit provides a participant with their own secure, locked space including a bed, electricity, and heat/AC. Villages **provide safety from the street and a way to build community, while navigating towards permanent housing.**

Rockwood Bridge Motel Shelter

This 44-room bridge shelter hosts participants that have **already been approved for permanent supportive housing** and need a transitional space as they await their new home. Bridge shelters 'bridge the gap' that many face when shifting from shelter to housing. This shelter provides participants with ongoing behavioral health support, community, and additional resources to ensure success in retaining housing and thriving.
